

# CIRCULAIRE® II

LATEX FREE | SINGLE PATIENT USE | DISPOSABLE | CE MARK

The Circulaire® II nebulizer system delivers medication in a fraction of the time while eliminating wasted medication during exhalation. A bacterial/viral filter can also be used to help protect caregivers from potentially harmful bioaerosols.

Adult or pediatric non-vented mask options

- Desirable closed system nebulizer for hospital and home
- The VixOne™ Nebulizer helps ensure the delivery of an ideal particle size (MMAD ~2.7 uM) and the highest respirable mass (~82%)
- Detachable reservoir bag encourages deep breathing through visualization of inhalation and exhalation
- Expiratory Resistor allows clinician to help enhance pulmonary deposition while minimizing environmental contamination
- Can be administered with the use of a mouthpiece or swivel mask to accommodate patient position
- Expiratory filter helps protect caregivers from potentially harmful bioaerosols
